## TO OUR PATRONS

---

We wish to thank our customers for their generous orders and many testimonials of our stock for last season. Our experience has been that the success of our field grown tubers in all parts of the country is due to the firmness and healthy condition of the bulbs produced by our soil and climate. The former being sandy and well drained produces good solid vigorous bulbs, and the latter by its mildness and moisture forms fine healthy plants, absolutely free from pests and blights. For these reasons we believe that Puget Sound Dahlias lead the world.

Needless to say, we are constantly on the alert to improve our stock by the addition of new and meritorious varieties, and never offer to our patrons any varieties which we have not thoroughly tried and tested ourselves.

The accompanying price list represents a collection of the best attainable stock, which we have collected after years of selection from all parts of the world; each and every variety of which, we believe, will give the purchaser entire satisfaction.

We furnish strong field grown tubers, keeping up the standard of other years. All bulbs carefully labeled, and will be mailed about the middle of April, unless otherwise specified.

**GUARANTEE**—Although we take all possible pains, we will not be held responsible beyond the purchase price. We guarantee every bulb, root and plant we send out to be just as represented, absolutely true to name, reach its destination in good growing condition. We will cheerfully replace anything that fails to prove otherwise, and will appreciate your calling our attention to it.

All orders carefully packed and shipped by Parcel Post, prepaid to all parts of the United States.

Terms: Cash in advance.

Remittances may be made by Check, Post Office or Express Money Order, or stamps for small amounts.

Write your name and address plainly.

Directions for culture sent on application.

## OUR OWN INTRODUCTION

---

We especially recommend for merit and uniqueness the following, originated by ourselves, and found no where else. We offer these, feeling confident that they have become fixed in their habits, and have special characteristics and good qualities that will please you.

- ANNA NORBURY—Decorative.** A full fluffy flower, flesh color deepening to pink, soft and delicate..... .25
- ARCTIC—Peony.** (Our Own Introduction). See cut opposite 2.50
- CHARLA—Medium Sized Peony.** A new type of Dahlia, used extensively in England and Europe for a gardening or bedding dahlia, or for mass display. A most dainty and attractive pink, similar in color to the LaFrance rose. We recommend this flower for its remarkable blooming proclivities, and believe that for those who wish a mass of bloom in their garden this dahlia cannot be surpassed..... .25
- DORIS—Medium Sized Peony.** Primrose yellow, edged with pastel shades, strong upright stems, free bloomer..... .50
- EDNA B—Decorative.** Soft buff, deepening to amber at base of petals, good stems. The most profuse bloomer we have. Blossoms very early and is a mass of flowers during the entire season, fine for cutting, or for a hedge..... .35
- FANCHON—Cactus.** A new type of cactus with unique color, crimson with pink and white shadings nicely blended, making an attractive flower. Stem long and habit good..... .25
- FANNY ELLIS—Peony.** The leaves of this dahlia are curled, giving a feathery appearance; color, soft yellow overlaid peach pink ..... .25
- HENRY A. RHODES—Decorative.** Old rose, tipped silvery pink, base primrose yellow, strong stem and good keeper .50
- JENNIE R.—Single.** Crimson maroon with white center, large and fine. One of the best for decorating. Good keeper.... .25
- LaTOSCA—Duplex.** Color primrose center shaded with cherry red. Fine for cutting, good keeper and very decorative.... .25

## ARCTIC

Absolutely pure white, most perfect in form, heavily petalled, yet fluffy and graceful, immense size, commonly eight and nine inches in diameter without disbudding or especial care. Can be grown to immense size. Very long and strong stems holding the flower well above the foliage, . Good habits in every way.

Many of the best Dahlia Growers write us, "Arctic is the greatest Dahlia grown."

Won first prize and silver cup for best twelve of one kind, growing plants, at the big flower show at California Flower Show and Horticultural Exhibition, Los Angeles, Exposition Park, in October. First prize for best Peony at Western Washington Fair 1921.

If you exhibit "Arctic" you will win, for the simple reason that there are not in the world today half a dozen Dahlias that can possibly equal it for size and beauty.

**PRICE, \$2.50**

- L I T A—Peony.** This Dahlia is one of the most profuse bloomers ever produced. Very early and blossoms until frost without losing its color, the beautiful pink of Delice, constantly in bloom, its blossoms standing well outside of the bush, on long stiff stems. A row of LITA is as beautiful as a row of "Testout" roses, lasting much longer. A mass of them is wonderfully effective. One of the very best for cut flowers, fine for designing, decorating or basket work. Not of the large peony type, but in a class of its own, being about four or five inches in diameter, and quite symmetrical. Ornamental shrubbery, about four feet high. Will produce more flowers in a season than any other dahlia grown ..... .50
- MAPLE LEAF—Peony.** A good size graceful peony with long stems; colors of the maple leaf touched by frost. Most gorgeous flower in the garden..... .50
- PEACHBLOW—Peony.** This dahlia we have placed in the Peony class, altho it rarely shows an open center. In form like a water lily, color of peach blossoms with soft yellow center ..... .50
- VASHON—Peony.** A very large graceful peony with unusually long and strong stems; color, a beautiful primrose yellow, suffused with shades of pink. It is a very free bloomer, and the flowers last well when cut. Many satisfied customers have told us that Vashon is one of the most satisfactory dahlias they have ever grown. Your collection is not complete without it..... .50
- W. H. PAULHAMUS—Peony.** The colors of autumn leaves, from yellow to Indian red with shadings of amber and gold; large size, good stem..... .50

## CACTUS DAHLIAS

---

The Cactus Dahlias are by far the most popular of the dahlia family, having long twisted petals of the most beautiful colors, many of them blending one color into another in the most exquisite manner. The flowers are loosely arranged and very irregular, often resembling the Chrysanthemum. The Hybrid Cactus have broader, more massive and flatter petals.
